

Drug Discovery in Infectious Disease

A Joint Symposium of the Grenoble
Drug Discovery & Host-Pathogen Interactions Clubs

November 19, 2024

European Radiation Synchrotron Facility, Grenoble

PRELIMINARY PROGRAMME

- 9:30 – 9:50 **Registration**
- 9:50 – 10:00 **Welcome**
- 10:00 – 10:40 **Vincent Libis**, Inserm/Université Paris Cité, U1284 Paris
Scalable discovery of microbial secondary metabolites through synthetic biology
- 10:40 – 11:00 **Presentation from selected abstract**
- 11:00 – 11:20 **Flash Poster Session**
- 11:20 – 12:00 **Nathalie Bosquet**, IDMIT Fontenay-aux-Roses
Title forthcoming (Topic: Infectious disease models & innovative therapies)
-
- 12:00 – 13:45 **Buffet Lunch**
-
- 14:00 – 14:40 **Gerald Larrouy-Maumus**, Imperial College London
Defining the role of cAMP signalling in mycobacteria
- 14:40 – 15:00 **Presentation from selected abstract**
-
- 15:00 – 15:45 **Coffee & Poster Session**
-
- 15:45 – 16:25 **Philippe Bulet**, BioPark Archamps
Spheniscins, avian β -defensins from king penguin stomach contents help fight antibiotic resistance
- 16:25 – 16:45 **Presentation from selected abstract**
- 16:45 – 16:50 **Concluding remarks**
